KAAAK Creative

Digital Marketing Project Report

DEPI Digital Marketing Track

Prepared by: KAAAK Creative Team

Project Type: Digital Marketing Strategy, Content Creation, Brand Development, and Paid Advertising

---

1. Project Planning & Management

1.1 Project Proposal

Project Overview

KAAAK Creative is a digital marketing agency project developed to build a distinctive agency identity and apply digital marketing concepts through practical work with different brands and businesses.

The project combines brand development, client communication, marketing strategy, market research, content planning, copywriting, graphic design, social media publishing, and paid advertising where applicable.

The agency's creative direction is based on the idea of making brands stand out through strategic thinking and distinctive creative execution.

Brand Positioning: We make brands impossible to ignore.

Brand Line: WE MAKE NOISE.

Core Services: Strategy · Creative · Content.

Project Objectives

The main objectives of the project are to:

1. Establish a recognizable identity and positioning for KAAAK Creative.
2. Develop marketing strategies based on each client's business needs and objectives.
3. Conduct market, competitor, and audience research to support marketing decisions.
4. Create relevant content ideas, copywriting, and visual assets.
5. Develop and implement social media content plans.
6. Support brand awareness and client acquisition through digital channels.
7. Launch and monitor paid advertising campaigns when required.
8. Apply digital marketing tools and methods in practical business scenarios.
9. Establish a collaborative workflow with clearly assigned team responsibilities.
10. Document the work completed and evaluate performance using available evidence and analytics.

Project Scope

The project includes:

- Agency brand development and positioning.
- Client communication and business requirement gathering.
- Marketing and content strategy development.
- Content pillars, creative concepts, and content calendars.
- Copywriting and social media content creation.
- Graphic design and visual identity development where required.
- Social media account setup and content publishing.
- Market and competitor research.
- Keyword research using Google Ads Keyword Planner where applicable.
- Paid advertising campaign implementation and monitoring.
- Performance tracking using available platform analytics.
- Project documentation and evidence collection.

Out of Scope

The project does not include:

- Software or application development.
- Guaranteed sales, leads, or campaign results.
- Claims of improved performance without supporting analytics.
- Financial or business outcomes that have not been verified.
- Research findings or audience insights that have not been collected or validated.

Project Workstreams

Workstream 1: KAAAK Creative

Developing the agency's brand identity, positioning, social media presence, and content to communicate its creative approach and digital marketing services.

Workstream 2: Golden Breed Farm

Developing marketing and content strategies for a livestock breeding and sales business, with a focus on communicating the farm's offerings and brand value.

The brand's core phrase is:

جودة تبدأ من الأصل

Workstream 3: Data Rift

Developing a brand direction for an educational business focused on Data Analysis, Data Engineering, and Artificial Intelligence. The work includes naming and visual identity exploration, including the Data Rift logo.

Workstream 4: Zenith Academy

Developing and implementing digital marketing activities for an educational academy serving students across different school stages. Activities include strategy development, content creation and publishing, and paid advertising campaigns.

1.2 Project Plan

The project was organized into phases to move from agency development and client understanding to strategy, implementation, and evaluation.

Phase	Main Activities	Status
1. Agency Development	Establishing KAAAK Creative's name, identity, positioning, and social media presence	Implemented
2. Client Understanding	Communicating with clients and gathering business requirements and available information	Conducted as part of client work
3. Strategy Development	Developing marketing and content strategies for client workstreams	Strategies developed for relevant projects
4. Content Development	Researching ideas, planning content, writing copy, and preparing creative assets	Implemented across active workstreams
5. Implementation	Publishing content and launching advertising campaigns where applicable	Implemented for active workstreams
6. Research and Evaluation	Using research tools and reviewing available platform analytics	Partially implemented; evidence depends on available data

Project Milestones

The main milestones include:

- Establishing the KAAAK Creative identity.
- Organizing the team and assigning responsibilities.
- Defining client requirements and workstream objectives.
- Developing marketing and content strategies.
- Preparing brand and content assets.
- Publishing social media content.
- Launching paid advertising campaigns for Zenith Academy.
- Collecting evidence and reviewing available campaign data.

Resource Allocation

The project uses the following resources:

- Team members with responsibilities across strategy, content, research, design, and paid media.
- Client briefs, business information, and available brand materials.
- Social media platforms for publishing and communication.
- Google Ads Keyword Planner for keyword research where relevant.
- Meta Business Suite for social media management and performance review.
- Graphic design and content creation tools.
- Advertising platform tools for campaign setup and monitoring.
- Available analytics and reporting data.

1.3 Task Assignment & Roles

The project uses a collaborative team structure in which each member contributes to a different part of the marketing workflow.

Team Members and Responsibilities

1. Fatma Nasser – Team Leader & Digital Marketing Strategist

- Leads the team and coordinates project tasks.
- Communicates with clients and gathers business requirements.
- Prepares and organizes client briefs.
- Develops marketing and content strategies.
- Contributes to ideation, creative direction, and design concepts.
- Developed the KAAAK Creative brand identity, including its name, logo direction, and tone of voice.
- Sets up and manages the agency's social media presence.
- Supports client acquisition and project planning.
- Monitors progress and coordinates deliverables across the team.

2. Hagar Galal – Paid Media Specialist & Client Acquisition

- Supports client acquisition activities.
- Plans and launches paid advertising campaigns.
- Supports audience targeting and ad creative selection.
- Monitors campaign performance and available KPIs.
- Coordinates with the content team to align advertising with client objectives.

3. Salma Adel – Content Creator & Copywriter

- Develops social media content ideas.
- Writes captions and post copy.
- Supports content calendar preparation and scheduling.
- Ensures content aligns with each brand's tone and objectives.
- Coordinates with the design team to align copy and visuals.

4. Merna Kades – Content Planner & Creative Researcher

- Researches content ideas, industries, and relevant audiences.
- Develops creative concepts and content angles.
- Supports content pillars and calendar planning.
- Identifies relevant trends and opportunities.
- Helps ensure that content supports the overall strategy.

5. Hossam Mohamed – Graphic Designer & Content Support

- Designs social media posts and visual assets.
- Translates content ideas into visual communication.
- Supports brainstorming and content development.
- Maintains visual consistency across deliverables.
- Contributes practical feedback and business insights through his experience as an agency client.

6. Ramadan Elsayed – Marketing Research Assistant

- Conducts market and competitor research.
- Investigates relevant trends and content opportunities.
- Collects information about audience characteristics and interests.
- Organizes research findings to support content and strategy planning.

Team Collaboration Workflow

The general workflow involves gathering client requirements, researching the market and audience, developing a strategic direction, planning content, preparing copy and visual assets, reviewing deliverables, publishing content, and reviewing available performance data.

Team members collaborate according to their assigned responsibilities, while the Team Leader coordinates progress and communication.

1.4 Risk Assessment & Mitigation Plan

The team identified potential risks that could affect project quality, delivery, and implementation.

Risk	Potential Impact	Mitigation Strategy
Incomplete client information	Strategies may not fully reflect business needs	Gather requirements, clarify questions, and confirm available information
Limited market or competitor data	Decisions may rely on incomplete assumptions	Conduct relevant research and document limitations
Content production delays	Publishing schedules may be affected	Assign responsibilities, set deadlines, and follow up on progress
Inconsistent brand communication	Content may not reflect the intended brand identity	Review copy and visual assets before publication
Paid advertising underperformance	Campaign objectives may not be achieved	Monitor available KPIs and review targeting, creative, and campaign settings
Limited performance data	Evaluation may be incomplete	Collect available analytics and clearly document missing information
Limited time or resources	Some activities may require prioritization	Focus on essential deliverables and allocate tasks according to capacity
Team restructuring and member turnover	Responsibilities and workflows may need adjustment	Redefine roles, improve coordination, and prioritize essential client deliverables
Changes in client requirements	Existing plans may need revision	Confirm new requirements and update tasks where necessary

Team Restructuring Risk

During the project, approximately half of the original team members changed, requiring the team to reorganize responsibilities, establish new working processes, and adapt to working with new clients.

Active work with the new clients began in mid-October 2026, resulting in a limited implementation period for some activities.

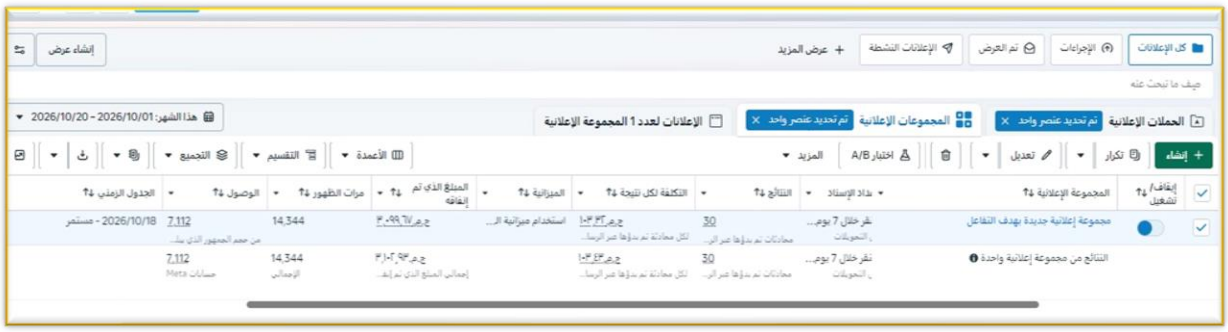

Mitigation Approach: The team redefined responsibilities, coordinated tasks, prioritized essential deliverables, and worked to establish a clear workflow for the restructured team.

1.5 Key Performance Indicators (KPIs)

KPIs were identified to guide the evaluation of agency activity, content implementation, and paid advertising. Actual performance should be reported only when supported by platform data.

Workstream	Relevant KPIs
KAAAK Creative	Reach, impressions, engagement, profile visits, service inquiries, and leads where tracked
Golden Breed Farm	Reach, impressions, engagement, profile visits, and customer inquiries were tracked
Data Rift	Reach, engagement, profile visits, and inquiries about educational programs if applicable
Zenith Academy	Reach, impressions, engagement, link clicks, cost per result, inquiries, and enrollments were tracked

---

2. Requirements Gathering

2.1 Stakeholder Analysis

Stakeholder analysis identifies the people and groups involved in the project, their contributions, and their expectations.

The following analysis reflects the project's known team structure and workstreams. It should be updated if the actual client relationships or project responsibilities differ.

Stakeholder	Role / Contribution	Interests / Expectations
Fatma Nasser	Team Leader & Digital Marketing Strategist	Project progress, team coordination, client communication, and work quality
Hagar Galal	Paid Media Specialist & Client Acquisition	Advertising execution, client acquisition, and campaign performance
Salma Adel	Content Creator & Copywriter	Clear requirements, consistent brand voice, and timely content delivery
Merna Kades	Content Planner & Creative Researcher	Relevant research, creative ideas, and strategic content planning
Hossam Mohamed	Graphic Designer & Content Support	Clear briefs, visual consistency, and effective design execution
Ramadan Elsayed	Marketing Research Assistant	Relevant market, competitor, and audience insights
Golden Breed Farm	Client providing business information and requirements	Accurate brand representation and relevant marketing content
Data Rift	Educational brand workstream	A clear identity and consistent communication of its educational focus
Zenith Academy	Educational client	Relevant educational content and marketing activities aligned with business objectives
KAAAK Target Audience	Potential clients interested in marketing services	Understanding KAAAK's services, creative approach, and value
Client Target Audiences	People the client brands aim to reach	Relevant, accurate, and engaging content
DEPI Evaluators	Review project documentation and learning outcomes	Clear documentation and evidence of planning and implementation

Stakeholder Management Approach

The Team Leader coordinates internal communication and client requirements. Client information and feedback guide the development of strategies and content. Research supports planning, while available publishing and advertising data support evaluation.

2.2 User Stories & Use Cases

User stories describe what different audiences may need from the brands and how the marketing activities can support those needs. They are planning tools and should not be interpreted as verified customer behavior.

KAAAK Creative

User Story: As a potential client, I want to understand KAAAK Creative's services and creative approach so I can determine whether the agency is suitable for my business.

Use Case: A potential client discovers KAAAK through social media content, reviews the agency's work and services, and contacts the team to discuss a project.

Golden Breed Farm

User Story: As a potential customer, I want clear and reliable information about the farm and its livestock offerings so I can make an informed decision.

Use Case: A customer discovers farm content, reviews the available information, and contacts the farm to ask about products or availability.

Data Rift

User Story: As someone interested in technology education, I want to understand the educational areas offered by Data Rift so I can determine whether its direction matches my learning goals.

Use Case: A prospective learner discovers the brand identity or future educational content and seeks information about Data Analysis, Data Engineering, or Artificial Intelligence.

Zenith Academy

User Story: As a student or parent, I want to understand the academy's educational offerings so I can determine whether they meet my learning needs.

Use Case: A student or parent discovers educational content or an advertisement, reviews the information, and makes an inquiry when interested.

2.3 Functional Requirements

Functional requirements describe the activities and outputs the project needs to deliver.

Agency-Level Requirements

- Establish and maintain KAAAK Creative's identity and positioning.
- Communicate the agency's services and creative approach.
- Manage the agency's social media presence.
- Develop content that supports brand awareness and potential client acquisition.
- Coordinate internal tasks and review deliverables.
- Maintain consistency between strategic direction, copy, and visual design.

Golden Breed Farm Requirements

- Develop content aligned with the farm's business and communication needs.
- Communicate relevant information about the farm and its livestock offerings.
- Use the core phrase **"جودة تبدأ من الأصل"** consistently where appropriate.
- Ensure that factual claims about livestock, breeding, and products are verified.
- Prepare and publish content aligned with the approved marketing direction.

Data Rift Requirements

- Establish a recognizable brand direction.
- Communicate the brand's focus on Data Analysis, Data Engineering, and Artificial Intelligence.
- Develop visual assets aligned with the selected brand direction.
- Prepare a consistent foundation for future marketing and educational content.

Zenith Academy Requirements

- Develop marketing and content direction for the academy.
- Prepare relevant educational content for its target audiences.
- Publish content through the appropriate social media channels.
- Launch paid campaigns where required.
- Monitor available advertising data and evaluate performance using verified metrics.

Research and Evaluation Requirements

- Gather available client and market information.
- Use appropriate research tools when relevant.
- Review available social media and advertising analytics.
- Record performance metrics with their reporting periods.
- Document limitations when data is unavailable.

2.4 Non-Functional Requirements

Non-functional requirements define the quality standards that should guide project delivery.

Requirement	Description
Brand Consistency	Content and visuals should reflect each brand's identity and positioning
Content Quality	Copy should be clear, relevant, and appropriate for its audience
Accuracy	Business information and factual claims should be supported by reliable sources
Visual Consistency	Design assets should follow the selected visual direction
Strategic Alignment	Content should support the objectives of the relevant workstream
Platform Suitability	Content formats should be appropriate for the intended social platform
Measurability	Performance should be evaluated through available and relevant metrics
Timeliness	Deliverables should be prepared and published according to agreed schedules
Collaboration	Responsibilities and communication should be clear across the team
Adaptability	Strategies and tasks should be adjusted when client needs or project circumstances change

2.5 Requirements and Information Gaps

Some information is necessary for a more detailed evaluation but must be confirmed from actual project records.

The main areas to verify include:

- Detailed audience profiles for each client.
- Documented competitor research and findings.
- Confirmed campaign objectives.
- Advertising budgets and campaign settings.
- Historical social media and advertising analytics.
- Verified inquiries, leads, or enrollments.
- Exact project dates and delivery deadlines.
- Evidence of task assignment and completed milestones.
- Available client feedback and approval records.

These items represent information to collect or verify; they should not be presented as completed research unless supporting evidence exists.

2.6 Requirements Summary

The requirements gathering stage establishes the foundation for planning and delivering the agency's workstreams.

The team needs to understand each client's business, define the intended audience and communication objectives, develop suitable content, and coordinate implementation. Brand consistency, factual accuracy, timely delivery, and measurable evaluation guide the work.

The specific requirements vary by workstream: KAAAK Creative focuses on agency identity and client acquisition; Golden Breed Farm focuses on communicating the farm's brand and offerings; Data Rift focuses on establishing an educational brand direction; and Zenith Academy focuses on educational marketing content and paid advertising.

3. Literature Review & Market Research

3.1 Purpose of Market Research

Market research supports marketing decisions by helping the team understand the business environment, audience needs, competitor communication, and opportunities for differentiation.

Within this project, research is intended to inform brand positioning, content planning, creative concepts, and advertising decisions across the different workstreams.

The depth of the research varies according to the information available for each client. Specific research findings should be included only when supported by collected data or documented sources.

3.2 Research Areas

Audience Research

Audience research helps identify relevant audience characteristics, interests, needs, and questions.

For KAAAK Creative, this means understanding the needs of potential businesses seeking marketing services. For Golden Breed Farm, it means understanding the information potential customers need about the farm and its offerings. For Data Rift, it means considering the interests of people exploring technology education. For Zenith Academy, it means considering the information students and parents need when evaluating educational services.

These are research directions rather than confirmed audience findings unless supported by collected evidence.

Competitor Research

Competitor research can help the team review:

- Competitor positioning and service communication.
- Content formats and recurring themes.
- Visual identity and tone of voice.
- Engagement patterns where visible.
- Potential content gaps and differentiation opportunities.

Keyword Research

Google Ads Keyword Planner can support keyword discovery and provide estimates that help inform relevant search marketing decisions.

The tool was used as part of the project's research activities. Any keyword lists, search volume estimates, or competition indicators included in the final report should be copied from the actual results collected by the team.

Social Media and Advertising Research

Meta Business Suite was used as part of the project's social media management and performance review activities. Available platform insights can help the team assess reach, engagement, content performance, and other relevant metrics.

Paid advertising data can also help evaluate delivery, clicks, spending, and cost per result where these metrics are available.

3.3 Applying Research to the Workstreams

Research should inform practical decisions rather than remain separate from implementation.

- **KAAAK Creative:** Use relevant audience and competitor insights to communicate the agency's identity, services, and creative value.
- **Golden Breed Farm:** Use verified business information and relevant market observations to guide content themes and brand communication.
- **Data Rift:** Use the intended educational focus to guide brand identity and future content direction.
- **Zenith Academy:** Use the academy's requirements and available audience information to guide educational content and paid campaign decisions.

3.4 Research Limitations

The project report should distinguish between research tools used, research findings actually collected, and future research opportunities.

No search volumes, competitor rankings, audience demographics, campaign benchmarks, or market conclusions should be reported without supporting evidence. Where research is incomplete, the limitation should be stated clearly.

4. Project Implementation & Achievements

This section presents practical outputs developed during the project. Each subsection should include a short explanation of the work completed and evidence that demonstrates the relevant activity.

4.1 KAAAK Creative – Agency Brand Development and Social Media Content

Overview

KAAAK Creative was developed as the agency brand through a distinctive identity and a clear creative positioning. The identity communicates the agency's ambition to help brands stand out through strategic thinking, creative execution, and content.

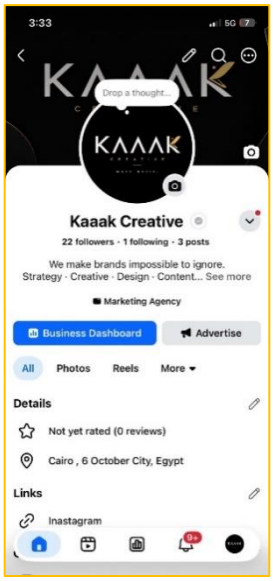

The agency's brand direction is expressed through the positioning statement **"We make brands impossible to ignore"** and the brand line **"WE MAKE NOISE."**

Social media content was prepared and published to begin establishing the agency's presence and communicating its creative direction.

Work Completed

- Developed the agency name and brand direction.
- Established the agency's core positioning and messaging.
- Developed the visual identity and logo direction.
- Set up the agency's social media presence.
- Created and published social media content.
- Communicated the agency's services and creative approach.

Evidence to Include

4.2 Golden Breed Farm – Marketing Strategy and Content Implementation

Overview

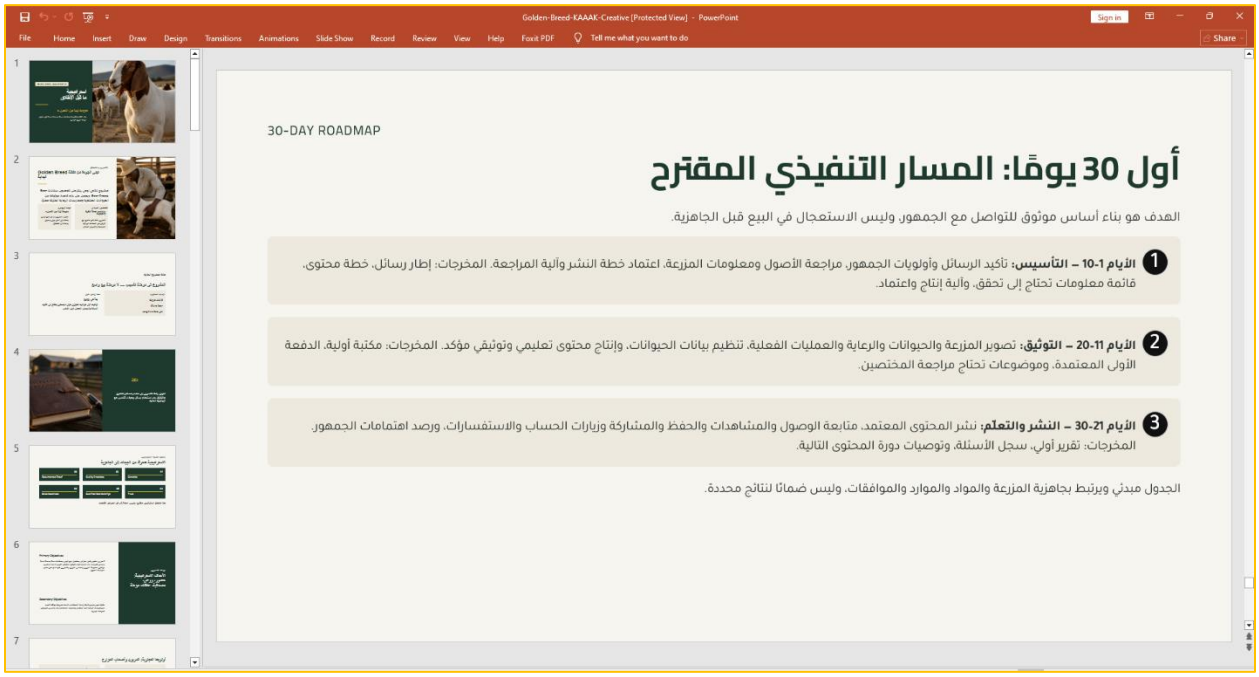

Golden Breed Farm is a livestock breeding and sales business. The marketing work focused on developing a content direction aligned with the farm's business and communicating its value through a consistent brand message.

The strategy uses the core phrase **"جودة تبدأ من الأصل"** and provides a foundation for planning content that reflects the farm's identity and offerings.

Work Completed

- Developed a marketing and content strategy for Golden Breed Farm.
- Organized the strategic direction and content themes.
- Prepared content ideas aligned with the brand.
- Developed and published content as part of the implementation process.

Evidence to Include

4.3 Data Rift – Brand Naming and Visual Identity Development

Overview

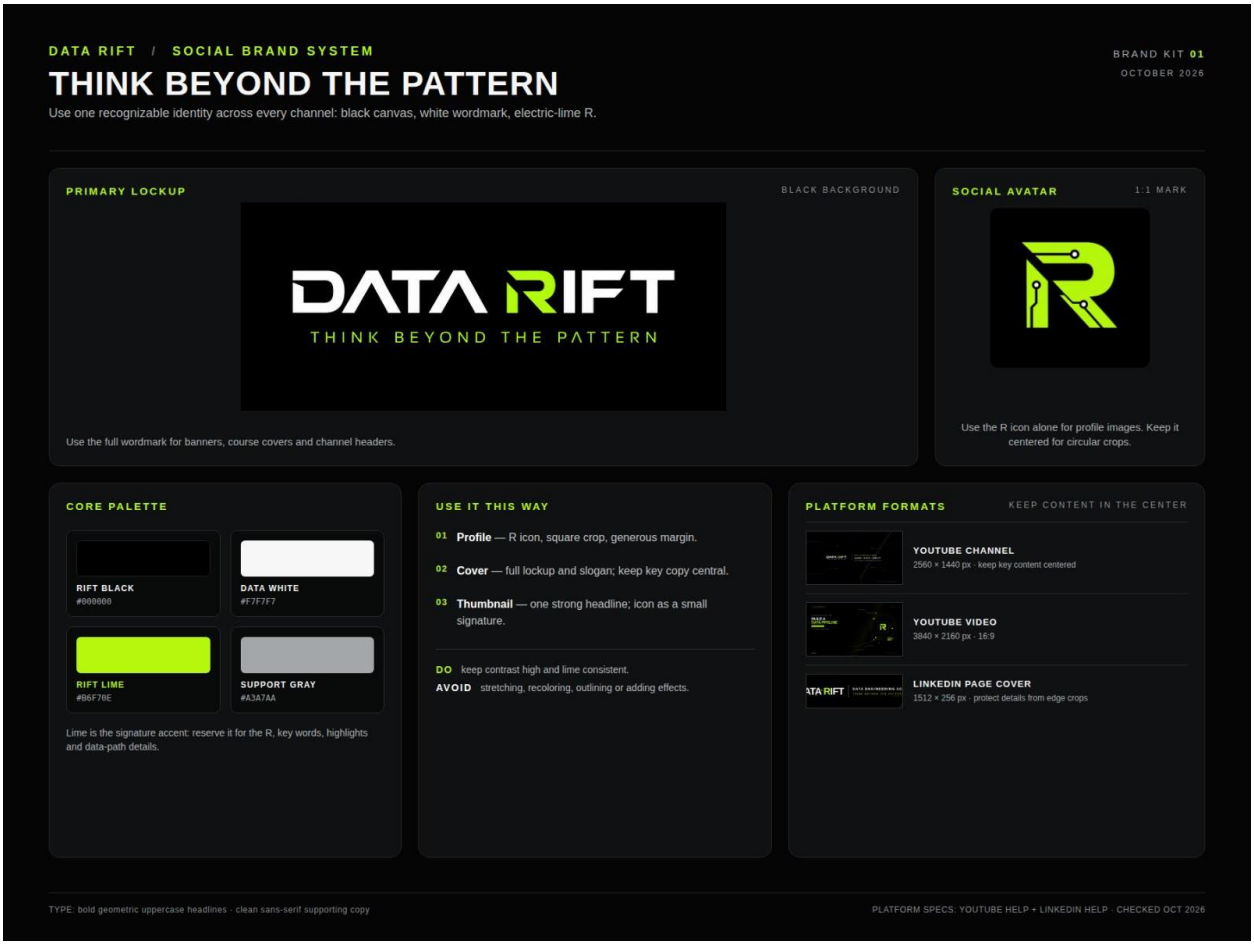

Data Rift is an educational brand concept focused on Data Analysis, Data Engineering, and Artificial Intelligence.

The work focused on establishing a distinctive brand direction suitable for a technical education audience. The naming and visual identity exploration aimed to create a recognizable foundation for future communication.

Work Completed

- Explored brand naming options.
- Selected or developed the Data Rift brand direction for the project.
- Developed a visual identity direction.
- Created a logo concept for Data Rift.

Evidence to Include

4.4 Zenith Academy – Content Marketing and Paid Advertising

Overview

Zenith Academy is an educational academy serving students across different school stages.

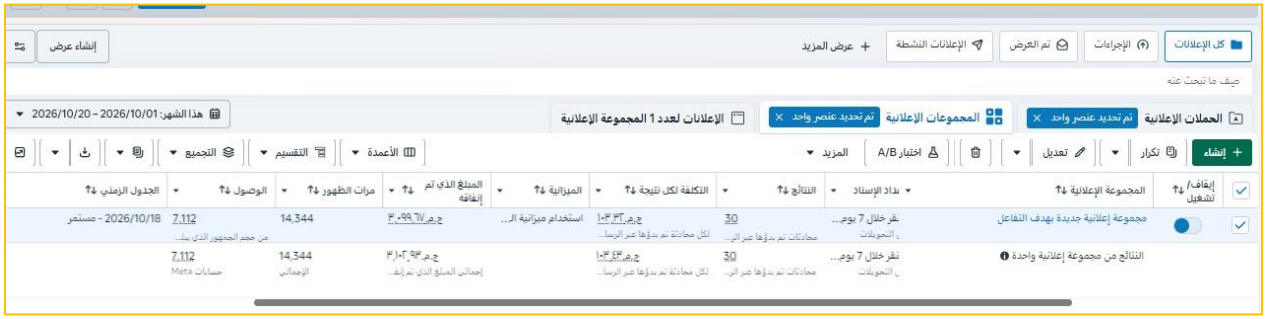

The project involved developing marketing direction, preparing educational content, publishing social media posts, and launching paid advertising campaigns.

The work connects content creation with advertising implementation and provides an opportunity to review actual campaign data where available.

Work Completed

- Developed marketing and content direction for the academy.
- Prepared educational content for social media.
- Published content through the relevant channels.
- Launched paid advertising campaigns.
- Used available advertising reports to review campaign activity and performance.

Evidence to Include

4.5 Tools Used During the Project

Meta Business Suite

Meta Business Suite was used to support social media management and review available performance information. It also provides a source of evidence for published content and advertising-related reporting, depending on the connected accounts and data available.

Content and Design Tools

The team used available content creation and design tools to develop visual assets and prepare social media materials.

---

5. Evaluation and Learning Outcomes

5.1 Project Evaluation

The project combined planning with practical implementation across four workstreams. The available outputs include agency identity development, client strategy work, content creation, published social media content, logo development, and paid advertising implementation.

The level of evaluation differs by workstream. For example, published content demonstrates implementation, while verified analytics are needed to assess audience response and advertising performance.

The evaluation should therefore distinguish between completed deliverables and measurable outcomes.

5.2 Key Learning Outcomes

Through the project, the team applied practical digital marketing activities, including:

- Translating business requirements into marketing direction.
- Developing brand positioning and communication.
- Planning content around brand objectives.
- Coordinating copywriting, research, and graphic design.
- Managing social media content and publishing.
- Using keyword research tools where relevant.
- Implementing paid advertising campaigns.
- Reviewing available campaign metrics.
- Collaborating across different responsibilities.
- Adapting team workflows to changing project needs.
- Documenting work and identifying gaps in available evidence.

5.3 Challenges and Adaptation

The team experienced changes in its composition and responsibilities during the project. This required adjustments to task distribution, coordination, and workflow.

Working across different client types also required the team to adapt its content and marketing approach to different business needs rather than use one identical strategy for every brand.

These challenges highlighted the importance of clear responsibilities, documented requirements, consistent communication, and realistic prioritization.

5.4 Areas for Further Improvement

Potential areas for further development include:

- Collecting more detailed audience and competitor research.
- Defining measurable objectives for each workstream.
- Maintaining consistent records of content publication.
- Documenting campaign reporting periods and objectives.
- Comparing actual results with predefined KPIs.
- Gathering structured client feedback.
- Improving workflow documentation and progress tracking.

These are improvement opportunities and should not be described as completed actions unless the team has already implemented them.

---

6. Conclusion

KAAAK Creative's project demonstrates the application of digital marketing concepts through agency development and practical work across multiple brands.

The project includes the development of the KAAAK Creative identity and published agency content, marketing strategy and content implementation for Golden Breed Farm, brand identity development for Data Rift, and content marketing and paid advertising activities for Zenith Academy.

Together, these workstreams provide practical experience in planning, research, creative development, implementation, teamwork, and performance evaluation.

The report distinguishes between completed deliverables, ongoing activities, and outcomes that require further evidence. This ensures that the documentation reflects the actual work completed and provides a clear basis for evaluating the team's progress and learning.
